

# New Functionality Update

21 March 2023 / release 2.30.0

Last Mile  
Solutions

# Introduction

1. Please share this 'New Functionality Update' with your colleagues to make sure everyone in your organization is aware of the latest changes and new functionalities.
2. The new version 2.30 is scheduled to be released on 21<sup>st</sup> March at 22.00hr. A 30-60 mins downtime is expected.
3. This document is available on the customer support page, via the 'Support' button within EVC-net

# Content

1. Charging station management
2. Report

# #1 Charging Station Management

## Charging station management

# #1 Add SIM card ICCID/ phone number

**Target users:** CPO/ System users

**Product:** EVC-net

Previously, you could only add the phone number of the SIM card.

Now if you add ICCID, automatically phone number will be added. Conversely, if you add a phone number to your SIM Card, the system will pick up the ICCID.

Once the info is added, hit the Save button to see the effect.

Communication key	

## Charging station management

# #2 Display tariff for Charging station for home-charging

**Target users:** Company/ Employee

**Product:** EVC-net

Employees who own charging stations at home & receive reimbursement can now see the energy tariff applied. It will help them to know if the correct tariff is applied, as energy prices tend to change frequently.

The employee's companies can see two types of prices: total cost and reimbursement tariff.

Displayed tariffs are VAT applied.

**Where is this feature?**  
Charging Points

ID	Name	Cost center number	Ch#	Status	Tariff	Power (kW)	Energy (kWh)	Transaction time	User
1000032346			21173796		0.38 EUR				
Total						0,00			

## Charging station management

# #3 Removal of socket reservation feature

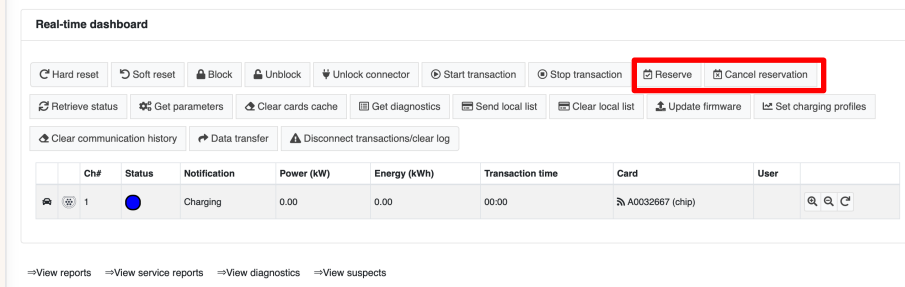

**Target users:** CPO/ Charging station owner

**Product:** EVC-net

Previously a charging station had a remote reservation feature. However, this functionality was not compatible with all hardware types, and was error-prone. We decided to remove this feature for now, until it is thoroughly validated.

**Where was this feature?**

Charging Points > Dashboard

The screenshot shows a 'Real-time dashboard' interface. At the top, there is a row of control buttons: 'Hard reset', 'Soft reset', 'Block', 'Unlock', 'Unlock connector', 'Start transaction', 'Stop transaction', 'Reserve', and 'Cancel reservation'. The 'Reserve' and 'Cancel reservation' buttons are highlighted with a red box, indicating their removal. Below this row are several other buttons for system management, such as 'Retrieve status', 'Get parameters', 'Clear cards cache', 'Get diagnostics', 'Send local list', 'Clear local list', 'Update firmware', and 'Set charging profiles'. A table below displays charging station data with columns for Ch#, Status, Notification, Power (kW), Energy (kWh), Transaction time, Card, and User. The table contains one row with a status of 'Charging'. At the bottom, there are links for 'View reports', 'View service reports', 'View diagnostics', and 'View suspects'.

Ch#	Status	Notification	Power (kW)	Energy (kWh)	Transaction time	Card	User
1	Charging	Charging	0.00	0.00	00:00	A0032667 (chip)	

# #2 Report

## Report

# #4 Obelisk report is available on customer level

**Target users:** CPO/ End-users

**Product:** All apps

Previously Obelisk reports were available on the provider level only. Now, this report is available on the customer level (end users and companies). Also, the report introduces an improved format.

Obelisk report is relevant to German customers.

# Thank you!
